Slide 2: My puffy

I am learning coding recently.

Let me show you my favourite cuisine!

```
food <- c ("Cantonese", "French", "Japanese", "Actually everything!")  
food
```

```
## [1] "Cantonese"          "French"              "Japanese"  
## [4] "Actually everything!"
```

OK. Finally some serious coding

I want R to tell me which numbers are less than 0 in the list

```
a <- c(8:-3)
```

```
a
```

```
## [1] 8 7 6 5 4 3 2 1 0 -1 -2 -3
```

```
length(a)
```

```
## [1] 12
```

```
a<0
```

```
## [1] FALSE FALSE FALSE FALSE FALSE FALSE FALSE FALSE FALSE TRUE
```

```
## [12] TRUE
```
